**PHASE I
ENVIRONMENTAL SITE ASSESSMENT REPORT**

**12.85 +/- Acres of Land
Southeast Corner of
Yucaipa Boulevard and Avenue E
Yucaipa, California**

1.0 EXECUTIVE SUMMARY

In May 2018, a Phase I Environmental Site Assessment (Phase I ESA), consistent with American Society for Testing Materials (ASTM) Standard E1527-13, was performed for the five adjoining parcels located at the southeast corner of Yucaipa Boulevard and Avenue E in Yucaipa, California (the Property, see **Figure 1** – Property Location Map).

Identified as adjoining County of San Bernardino Assessor Parcel Numbers (APNs) 0300-191-17, -28, -29, -30, and -31, the 12.85 +/- acre Property exists primarily as undeveloped land, except two of the five parcels at the southwest area of the Property which are occupied by single family homes. According to historical research performed during this investigation, it appears that the Property has remained generally the same as today (undeveloped and residential) since at least 1968, preceded by agricultural use dating back to 1938 (the oldest documentation available to TRG).

On May 3, 2018, The Reynolds Group (TRG) conducted an inspection of the Property and vicinity and took photographs. No adverse environmental conditions were observed during the inspection, nor were any discovered in historical research of the Property.

The Property lies in a mixed commercial and residential area of Yucaipa. Based on the Property's close proximity to two gasoline service stations to the northwest and two auto repair facilities to the north (see **Figure 2** – Property and Area Map), the Client opted to perform a limited Phase II at the Property to assess whether shallow soils at the Site may be impacted by operations at the gas stations and auto repair businesses. On May 5, 2018, twelve (12) shallow soil vapor samples

between 4 and 5 feet below ground surface (ft bgs) were collected at various locations on the Property. Laboratory analytical results for all soil vapor samples were “non-detect” for volatile organic compounds (VOCs), indicating that vapor intrusion health risk at the Site is not likely. The Phase II work is summarized in Section 8.8 of this report. The complete *Limited Phase II Soil Vapor Sampling Report*, dated May 15, 2018, is provided as **Appendix F**.

A few sites further out in the general area are listed in the historical environmental database report, however, they are not considered environmental concerns to the Property for reasons detailed in Section 7.3 of this report, including distance from the Property and regulatory closure.

Based on historical research and the Property reconnaissance the following recognized environmental condition (REC) was identified at the Property:

1. Possible pesticide and/or herbicide impact to shallow soils from approximately 30 years (1938 to 1968) of agricultural use.

It is the opinion of TRG that shallow soil sampling should be performed throughout the Property to mitigate or confirm the pesticide/herbicide REC.

2.0 INTRODUCTION

2.1 Purpose

TRG was contracted by Force Environmental, Inc. (the Client) to perform the Phase I ESA at the Property as due diligence for a possible real estate transaction.

The purpose of the Phase I ESA was to identify any RECs at the Property. The Phase I ESA was performed using generally accepted Phase I ESA industry standards in accordance with ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. In this report, and as defined by the ASTM, a REC is “the presence or likely

presence of any hazardous substances or petroleum products in, on, or at a property due to release to the environment; under conditions indicative of a release to the environment or under conditions that pose a material threat of future release. De minimis conditions are not recognized environmental conditions.”

2.2 Scope of Work

The following scope of work was performed to accomplish the Phase I ESA objectives:

- Visual Reconnaissance – A visual evaluation of the Property was conducted in readily accessible areas to identify RECs. Additionally, visual observations of adjoining properties were made from the vantage point of the subject Property as well as from public right-of-ways to determine the potential impact of these sites on the subject Property.
- Interviews – Verbal or written interviews with individuals knowledgeable and familiar with the Property.
- Records Review – Available environmental reports, agency records, appropriate permits, and historical aerial photographs of the subject Property and surrounding areas were reviewed.
- Agency Document Review – Appropriate regulatory agencies were contacted for information regarding any hazardous materials use, storage, and/or releases at the Property.
- Published Database Review – Reviewed published governmental agency databases to identify sites within ASTM-specified radii of the subject Property with a reported environmental concern or incident. TRG subcontracts the government agency database search to Environmental Data Resources, Inc. (EDR).
- Report Preparation – Prepare a summary report of the Phase I ESA work.
- Environmental Professional – All work associated with the project was performed by an environmental professional or under the supervision of an environmental professional.

2.3 Limitations and Exceptions

Topics not explicitly discussed within this document should not be assumed to have been investigated, such as physical testing, other than any specifically detailed in this report. The work performed in conjunction with this study and data developed are intended as a description of available information on the dates and at the locations described. This report does not warrant against future operations or conditions, nor does it warrant against:

- Operations that are not in evidence from visual observations or search of published agency records, or facts that were concealed, withheld, or not fully disclosed at the time the reconnaissance was conducted.
- Conditions that could only be determined by physical sampling or intrusive testing.
- Conditions or locations other than the Client-provided subject Property address and/or legal parcel description(s).

This report summarizes Phase I ESA work conducted by TRG in May 2018 at the subject Property. Although conditions at neighboring sites may impact the subject Property and, to the extent they were identified and included in the subject Property evaluation, this report does not serve as an assessment of sites other than the subject Property.

The conclusions and opinions presented are based on the scope of work outlined in this report. Evaluation of potential issues such as geotechnical soil conditions, air quality, flood plains, seismic conditions, asbestos-containing materials, mold, radon, lead-based paint, lead in drinking water and wetlands are not required by ASTM E1527-13 standards and, thus, were not included in the scope of services. TRG makes no warranties or guarantees as to the accuracy or completeness of information obtained from or compiled by others. Information may exist beyond the scope of this investigation. Additional information not found/available to TRG at the time of report writing may result in modifications of the conclusions presented. This report is not a legal opinion.

2.4 Reliance

The Phase I ESA was performed for the exclusive use of the Client and its investors, assignees, designees, and successors (collectively “Authorized Parties”). These Authorized Parties intend to rely upon this report as an assessment of the existing environmental condition of the subject Property. TRG recommends that any Authorized Party intending to rely upon the report independently determine whether the scope of services meets their expectations.

TRG’s professional services were performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable environmental professionals. No other warranty, expressed or implied, is made as to the professional opinions described in this report. TRG is not responsible or liable for any claims that are associated with the interpretation of the available information. Additionally, TRG is not responsible for any claims from third parties not associated with the Client, unless this report is assigned in its entirety to a party acceptable to TRG.

TRG exercised usual and customary professional care in its efforts to assess property environmental law/code/regulation compliance. However, due to the existence of literally thousands of laws, codes, and regulations pertaining to the environment, TRG cannot provide a definitive opinion concerning compliance with all laws/codes/regulations.

2.5 Proprietary Notice

This document and its contents are privileged and confidential information and should not be duplicated or copied under any circumstances without the expressed permission of TRG. Any unauthorized reuse of TRG reports or data will be at the unauthorized user’s sole risk and liability.

3.0 USER PROVIDED INFORMATION

3.1 Reason for Performing the Phase I ESA

According to Tom Robinson, Managing Member of VantageOne Real Estate Investments (potential new owner of the Property), the work was performed as due diligence for a potential Property purchase (see **Appendix B** – Owner Response to Interview Questions).

3.2 Title Records and Property Use Limitations

The Client elected to have TRG perform the ASTM-required environmental lien search. As such, TRG obtained deed related information from Environmental Data Resources (EDR) as part of the Environmental Lien Search (see **Appendix D**), based on the property APNs. Lien Search results show no Property use limitations, and the current Property owners as follows:

APN	Current Owner	Previous Owner	Deed Date
0300-191-17	Stater Bros. Markets	Michael S. Murray and Karin E. Murray, Husband and Wife	8-9-90
0300-191-28	Stater Bros. Markets	Petrolane Properties	3-29-83
0300-191-29	Stater Bros. Markets	Charles E. Irvin III Successor Trustee of The Charles E. Irvin, Jr., and Ardis L. Irvin Trust (1-5-96)	12-23-10
0300-191-30	Stater Bros. Markets	Charles E. Irvin III Successor Trustee of The Charles E. Irvin, Jr., and Ardis L. Irvin Trust (1-5-96)	12-23-10
0300-191-31	Stater Bros. Markets	Sherri Laffey-Long	11-5-13

3.3 Value Reduction for Environmental Issues

With reference to the sale price versus fair market value of the subject Property, according to Mr. Robinson, representing the potential buyer, the sale price of the Property is reasonable and not notably discounted due to potential environmental issues (see **Appendix B**).

4.0 PROPERTY AND ADJOINING SITE CHARACTERISTICS

Figure 1 shows the Property location, **Figure 2** is a plot plan of the Property, **Figure 3** includes historical topographic maps of the area, and **Figure 4** consists of historical aerial photographs of the vicinity. Photographs of the Property and the immediate area by the Consultant in January 2018 are included in **Appendix A** of this report.

4.1 Location

The Property is located in a mixed commercial and residential area of Yucaipa, adjoining south of Yucaipa Boulevard and east of Avenue E. Area landmarks include Interstate 10 approximately 400 feet to the south, the San Bernardino Mountains one mile further south, and Crafton Hills College and Library one mile to the northeast.

4.2 Property Description

The Property currently exists as primarily undeveloped land, except two single-family residential homes at the southwest corner of the Property. The Property slopes north to south, particularly at the approximate east boundary where a 10 to 20-foot slope exists. Bound by Yucaipa Boulevard to the north and Avenue E to the west, the Property is covered primarily with native grass and a few mature trees at the west and south sides. A graded dirt road runs east-west near the north boundary of the Property. The Property's legal description is provided in the Environmental Lien Search portion of **Appendix D**.

Potable water and sewer services for the Property are provided by Yucaipa Valley Water District. Natural gas is supplied by Southern California Gas Company, and electrical service by Southern California Edison.

4.3 Adjacent Sites

The subject Property sits in a mixed commercial and residential area of Yucaipa. Adjoining north of the Property, north of Yucaipa Boulevard, are several retail businesses including auto repair facilities, real estate offices, restaurants, and fitness and dance studios. On each side of Avenue E, south of the Property, are single family residential homes, some with large yards and/or acreage. East of the Property is undeveloped land similar to the subject Property, except a construction office, equipment staging area, and stockpiled dirt and asphalt at the northeast corner of the adjoining east Property. These appeared to be related to sewer/water pipeline construction in Yucaipa Boulevard at the time of inspection. A Mobil gasoline service station adjoins the Property at the northwest corner. Further west, west of Avenue E, are restaurants and residential homes.

5.0 ENVIRONMENTAL SETTING

According to information obtained from Geotracker at sites in Yucaipa (geotracker.swrcb.ca.gov, Global ID T0607100543 and T0607100136), sediments beneath the Property vicinity consist of Quaternary-aged alluvial fan deposits. Drilling logs at these nearby Sites indicate soils containing primarily sand and silty sand with occasional thin layers of sandy silt or clayey silt to 180 feet below ground surface (ft bgs, the deepest depth explored at the nearby site), and groundwater was not encountered. Groundwater is reported in Yucaipa at depths greater than 200 ft bgs. Groundwater flow direction beneath the Site is likely to the south, in the direction of local topography.

6.0 PROPERTY RECONNAISSANCE

6.1 Property Inspection Observations

On May 3, 2018, a representative of TRG conducted an inspection of the Property. Weather conditions were sunny and warm. Property photographs are included in **Appendix A**. The

inspection was performed from the west side to the east moving in a large grid pattern. The subject Property is described in detail in Section 4.2 of this report.

No hazardous chemical use or storage was noted during the Property inspection.

No hazardous dumping or disposal was observed on the Property. Some domestic trash such as food wrappers, cardboard, and beverage containers were viewed on the Property.

No evidence of wells, underground storage tanks, hydraulic lifts, or other potentially hazardous anomalies were observed on the Property.

No environmentally hazardous leaks or spills were observed during the inspection.

Numerous pole-mounted electrical transformers were observed along the north and west perimeter of the Property. All appeared in satisfactory condition with no obvious leaks or staining on or around the transformer poles. Maintenance and repair of the transformers is the responsibility of Edison Company.

No pungent or noxious air emissions were noted during the Property inspection.

No pits, ponds, lagoons, other standing water or wetlands were observed on the Property during the inspection.

6.2 Adjacent Site and Vicinity Observations

Adjacent sites are described in Section 4.3 of this report. No obvious issues of environmental concern were noted during the adjacent site inspections, as viewed from public right of ways. Gasoline and diesel operated construction equipment observed parked at the northeast corner of the adjoining east site and operating along the north boundary appeared to be newer and being temporarily used for the sewer/water pipeline installation in Yucaipa Boulevard. As such, gasoline

and diesel impact from construction equipment is not an issue of environmental concern at the Site. A few sites further out from the Property are listed in the Environmental Radius Map Report (see Section 7.1 and **Appendix C**), however, none are considered issues of concern to the Property for reasons including distance and direction from the Property and regulatory closure of the cases.

6.3 Interviews

Lists of standard due diligence questions was provided to TRG's contact for response from the current Property owners, however, the questionnaire was returned having been completed by a representative of the prospective buyer of the Property. Mr. Tom Robinson, Managing Member of VantageOne Real Estate Investments, LLC, (the potential Property owner) indicated in his response that he was unaware of any existing or historical environmental hazards at the Property, that no former operations have been performed at the Property, and that it has always existed as "vacant land". The complete questionnaire executed by Tom Robinson is provided as **Appendix B** of this report.

7.0 REGULATORY AGENCY DATABASE REVIEW

TRG retained EDR to provide a list of facilities within the Property vicinity that are currently under review, management, or notification by a regulatory agency as indicated in an EDR Radius Map with GeoCheck Report (see **Appendix C**). The following presents the regulatory files reviewed. The results of the subject Property and surrounding site listings are summarized in Sections 7.2 and 7.3.

Depending on the database, and in compliance with ASTM Standards, the approximate search distance includes only the subject Property or between 0.25 and 1.0 miles from the subject Property.

7.1 Government Databases Searched

The United States Environmental Protection Agency (EPA) National Priority List (NPL) and Delisted NPLs: The NPL is the EPA's database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. A site, to be included on the NPL, must either meet or surpass a predetermined hazard ranking system score, or be chosen as a state's top-priority site, or meet all three criteria of: 1) the US Department of Health and Human Services issues a health advisory recommending that people be removed from the site to avoid exposure; 2) EPA determines that the site represents a significant threat, and 3) EPA determines that the remedial action is more cost-effective. Delisted NPLs are those sites that may be deleted from the NPL where no further response is appropriate as determined by the EPA. The required minimum search distance is one mile from the Property for NPLs and ½ mile for Delisted NPLs.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) and CERCLIS No Further Remedial Action Planned (NFRAP): The CERCLIS database contains information on potentially hazardous waste sites that have been reported to the US EPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the CERCLA. CERCLIS contains sites which are either proposed to or on the NPL and sites which are in the screening and assessment phase for possible inclusion on the NPL. CERCLIS NFRAP contains information pertaining to facilities that have been removed from the CERCLIS database due to the absence of contamination following further investigation, sufficient remedial action of any contamination, or where contamination is not serious enough to warrant federal Superfund action or NPL consideration. The required minimum search distance for both CERCLIS and CERCLIS NFRAP is ½ mile from the subject Property.

Resource Conservation and Recovery Act (RCRIS): is a database which includes selected information on sites that generate, store, treat, or dispose of hazardous waste as defined by the Act. The list is developed and maintained by the EPA. The purpose of this listing is to summarize registration information and does not imply that contamination has occurred on the property,

but does identify potential sources of contamination. The RCRIS database is divided into small quantity generator (SQG) sites, large quantity generator (LQG) sites, and transfer, storage and disposal (TSD) sites. The required minimum search distance for RCRIS SQG and LQG is limited to the subject Property and adjoining sites, and is ½ mile for RCRIS TSD sites.

Institutional and Engineering Controls (IECs): IECs include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on the Property. Deed restrictions are generally required as part of the institutional controls and engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health. The search includes only the subject Property.

Emergency Response Notification System (ERNS): This listing is a database of incident notification information regarding incidents of reported releases of oil and hazardous substances. The search includes only the subject Property.

Consent: This database lists addresses involved in major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund). It is release periodically by the United States District Courts after settlement by the parties to the litigation matters. The search includes only the subject Property.

Records of Decision (RODs): RODs documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup. The required minimum search radius for RODs is one mile from the subject Property.

Mines: The Mines database is a record of mine locations maintained by the U.S. Department of Labor, Mine Safety, and Health Administration. The required minimum search radius is ¼ mile from the subject Property.

State Hazardous Waste Sites (SHWS): The SHWS database is maintained by the DTSC and is the State's equivalent to CERCLIS. The required minimum search distance from the subject Property is one mile.

Groundwater Contamination Inventory (GWCI): The GWCI is an inventory of all groundwater contamination cases. The required minimum search radius for this database is ½ mile from the Property.

Solid Waste Facilities/Landfills (SWF/LF): This is a database that is maintained by the Integrated Waste Management Board and identifies permitted solid waste facilities or landfills. These facilities may be active, inactive, or closed facilities, or open dumps that failed to meet RCRA criteria for solid waste landfills or disposal facilities. The required minimum search distance for the SWF/LF database is ½ mile from the Property.

Underground Storage Tanks (USTs) and Tribal USTs: is a list of registered underground storage tanks and those on Indian Land. The database is maintained by local agencies, most notably the fire departments, and contains a comprehensive listing of all registered USTs. The required minimum search distance is limited to the subject Property and adjacent sites for both USTs and Tribal USTs.

Leaking Underground Storage Tanks (LUST) and Tribal LUST: This is a list that compiles the State Water Resources Control Board (SWRCB) and Regional Water Quality Control Board (RWQCB) identified facilities that have had unauthorized releases from USTs and those on Indian Land. The required minimum search distance for both LUST and Tribal LUST cases is ½ mile from the subject Property.

Above Ground Storage Tanks (ASTs): The AST database is maintained by the RWQCB and contains listings of registered ASTs. The required search distance for this database is limited to the subject Property and adjacent sites.

Spill, Leaks, Investigations, and Clean-Ups (SLIC) is a database showing cases impacted by environmental incidents other than USTs. The required minimum search radius for the SLIC database is ½ mile from the subject Property.

Land Use Controls (AUL): This database lists sites in California that have institutional controls or engineering controls in place. The search requirement includes the subject Property only.

Voluntary Cleanup Program (VCP): The VCP is a listing of facilities and/or sites registered on the voluntary cleanup program database. Upon completion of the negotiated work in the VCP contract agreed upon by the DTSC and the non-responsible party, the non-responsible party received State Superfund liability protection. The required minimum search distance from the Property is ½ mile.

Dry Cleaners is a database listing dry cleaning facilities that have EPA ID numbers. The Dry Cleaning Facility Restoration Fund database is used to access, prioritize, and clean up contaminated registered dry-cleaning sites. The minimum required search distance for this database is ¼ mile from the subject Property.

Brownfields: The Brownfields is a component of the VCP, which allows a non-responsible party to acquire a contaminated property with State Superfund liability protection for existing contamination by agreeing to perform an environmental assessment and/or remediation. The required minimum search radius for the Brownfields database is ½ mile from the Property.

National Pollutant Discharge Elimination System (NPDES): The NPDES database maintains a database of waste water treatment facility locations. The EDR search radius for this database is limited to the subject Property. The required minimum search distance is limited to the subject Property.

Airs: This is a database listing permitted air facilities. The required minimum search distance is limited to the subject Property.

The aforementioned databases and search distances include those that are required by ASTM standards. Other supplemental database information is available in the full environmental disclosure report provided in **Appendix C**.

7.2 Subject Property Database Summary

There are no listings in the EDR database report for the subject Property.

7.3 Adjacent and Nearby Sites Database Summary

The following summary includes sites adjacent to or near the subject Property within the ASTM E1527-13 search radii. Where available, information from the EDR database report was updated using the State’s Geotracker website (geotracker.swrcb.ca.gov). A review of the EDR database report by TRG is summarized below.

Database	Business Name/Address	Association with Listing	Concern to Property?
RCRA-SQG	<ul style="list-style-type: none"> Chevron – 31412 Yucaipa 	Generator of small quantities of haz waste.	No. No violations reported.
ENVIROSTOR	<ul style="list-style-type: none"> Sorenson Engineering – 32032 Dunlap Jorco Chemical Co. – 32185 E. Outer Hwy 10 	Under investigation or evaluation by the DTSC.	No. According to Geotracker, both cases have been “closed” since at least 2012.
LUST HIST CORTESE	<ul style="list-style-type: none"> European Auto – 31516 Yucaipa Circle K – 31933 Yucaipa Sorenson Engineering – 32032 Dunlap 	Former leaking USTs	No. All three cases have received regulatory closure for having sufficiently cleaned impacted soil and/or groundwater.
UST	<ul style="list-style-type: none"> Circle Service – 31491 Yucaipa Mobil – 31429 Yucaipa (adjoining northwest) Chevron– 31412 Yucaipa 	Currently registered USTs	No, not at this time. None are shown to have experienced a leak or spill (LUST/SLIC) and, therefore, are not a concern at this time.

	<ul style="list-style-type: none"> • Arco AM/PM – 31340 Yucaipa • Yucaipa Gas Mart – 31340 Hampton • GK Market – 31583 E. Outer Hwy 10 		
SLIC	<ul style="list-style-type: none"> • Sorenson Engineering – 32032 Dunlap 	Spill and/or leak of chlorinated hydrocarbons	No. Open case, however, according to Geotracker (SL0607135888) groundwater impact does not extend beyond 17 th Street, east of the subject Property.
EDR HIST CLEANERS	<ul style="list-style-type: none"> • Nash’s Cleaners – 31776 Yucaipa • Steamers Dry Cleaner – 31364 Hampton 	Former Dry Cleaning Facility	No. Not shown in SLIC database above as having experience a leak or spill.

8.0 PROPERTY HISTORY/LAND USE REVIEW

8.1 Historical Topographic Maps

Historical topographic maps provided by EDR were also reviewed. Maps were available periodically from 1899 to 2012. The topographic gradient on all maps, where visible, is shown to vary, sloping in a southerly direction north of the Site from the Crafton Hills and in a northerly direction south of the Site from the San Bernardino Mountains. The Property is shown at the most westerly side of the Yucaipa Valley at approximately 2,100 feet above mean sea level (amsl). Yucaipa Creek approximately one mile south of the Property is the main water feature on all maps. Agricultural use on the Property and two small structures (likely residential/farm housing) appear on the 1954 map. Two or more structures appear on the Property, primarily along Yucaipa Boulevard at the north side, on the 1967 through 1996 maps. No structures appear on the Property in the most recent 2012 topographic map. Based on the size of the structures (small) and the lack of evidence indicating commercial use from other research performed during this investigation, the markings shown on the Property are likely residential use.

8.2 Historical Aerial Photographs

Aerial photographs of the Property and vicinity, as provided by EDR, were reviewed in order to ascertain historical land uses that may have been responsible for the generation/or storage of potentially hazardous materials at and near the Property. Copies of the aerial photographs are provided as **Figure 4** of this report.

1938 and 1949

The Property appears with agricultural use at the northeast area. The south and west areas are undeveloped land. One structure, likely a farm house, exists at the northeast corner of the Property. Yucaipa Boulevard to the north and Avenue E to the south are paved.

1953 and 1959

The subject Property remains agricultural use at the northeast area, however, additional structures now exist at the north-center boundary and at the south side. Development in the vicinity has increased notably, although several agricultural parcels remain in the area. Interstate 10 first appears in the 1953 photograph.

1968, 1975, and 1978

There is no longer agricultural use visible on the Property, but the 2 to 3 structures along the north boundary still appear, as do the two structures at the south side. The vicinity can be characterized as mixed residential and undeveloped land.

1985, 1989, and 1995

Only the two structures at the south side remain on the Property, likely residences that currently exist. The rest of the Property is undeveloped land. The immediate vicinity is primarily residential with some commercial buildings along each side of Interstate 10, south of the Property, and along the north side of Yucaipa Boulevard.

2006, 2010, and 2014

The Property and vicinity appear much like today. Two structures surrounded by trees occupy the south side of the Property, while the remainder of the Property is undeveloped. To the north, north of Yucaipa Boulevard, are commercial (larger) structures followed further north by residential housing. South of the Property also appears with residential use except businesses operating along Interstate 10. The adjoining east parcels are undeveloped, followed further east by primarily residential except a public storage facility along Yucaipa Boulevard and an Edison substation along Avenue E. A commercial building (currently a Mobil gas station) occupies the northwest corner of Yucaipa and Avenue E, adjoining northwest of the Property. Further west are mixed commercial buildings and vacant land extending west to the freeway on/off ramp.

8.3 Sanborn Fire Insurance Maps

No Sanborn Fire Insurance Maps were available for the subject Property addresses through EDR (see **Appendix D**).

8.4 City Directory Search

TRG also retained EDR to perform a City Directory Search. The complete City Directory as provided by EDR is included in **Appendix D** of this report. No businesses are shown for the Property based on the APNs provided to EDR by TRG. Listings for adjacent and nearby sites

include personal names (indicating residential use), landscape services, construction companies, real estate offices, and other environmentally benign businesses. The auto repair facilities adjacent north of the Property, north of Yucaipa Boulevard, and the gas station adjoining northwest are also listed in the City Directory, however, they are not issues of concern to the Property for reasons detailed elsewhere in this report.

8.5 Environmental Lien Search

A search for environmental liens was performed for the Property location using assessor parcel numbers associated with the Property. No environmental liens or activity and use limitations currently exist for the subject Property (see **Appendix D**). Lien Search results show the current Property owners as identified in Section 3.2 of this report. The Property's legal description is included in the Lien Search provided in **Appendix D**.

8.6 Vapor Encroachment Screen

A search for vapor encroachment at the Property was performed by EDR in accordance with ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10). This screening assist parties seeking to meet the search requirements in Real Estate Transactions. The Property is not listed in the federal or state databases, nor are any adjacent sites, suggesting no vapor intrusion risk at the Property. In addition, a soil vapor survey was performed at the Property in May 2018 showing non-detect results for VOCs (see Section 8.8 and **Appendix F**).

8.7 Agency Records Review

Agency file review findings are summarized below. Select file review documentation is provided in **Appendix E**.

- *City of Yucaipa Building and Planning Department* – TRG visited the Yucaipa Building and Planning Departments on May 3, 2018, to investigate any records related to the Site. According to Benjamin J. Matlock, Associate Planner, no records exist with the City for the subject Property (ref: 909-797-2489 Ext. 261 / bmatlock@yucaipa.org).
- *San Bernardino County Department of Environmental Health (SBCODEH)* – TRG submitted a public information request for the Property to the SBCODEH. As of the writing of this report, no response was received from the SBCODEH. This is considered a “Data Gap” as defined by ASTM E1527-13, however, it is the opinion of TRG that the SBCODEH data gap does not affect the findings of this investigation since no records for the Property are anticipated to exist with the SBCODEH based on other research performed.
- *Santa Ana Regional Water Quality Control Board (SARWQCB)* – A request for file review was submitted by TRG to the SARWQCB (filereview8@waterboards.ca.gov) for the subject Property APNs/location description. No response was received from the SARWQCB as of the writing of this report. This is considered a “Data Gap” as defined by ASTM E1527-13, however, it is the opinion of TRG that the SARWQCB data gap does not affect the findings of this investigation since no records are anticipated to exist with the SARWQCB based on other research performed.
- *State Water Resources Control Board Geotracker Web Site (geotracker.waterboards.ca.gov)* – The subject Property location is not shown as a case on the Geotracker website. One site adjacent north of the Property is shown, north of Yucaipa Boulevard (European Auto, 31516 Yucaipa Blvd., Global ID T0607100415). Details regarding this case indicate that it was soils only impact, and that it was issued regulatory closure back in 1996. As such, the European Auto case is not considered an issue of concern to the subject Property. No other cases are shown on Geotracker in the immediate vicinity.

- *Division of Oil, Gas, and Geothermal Resources (DOGGR, www.conservation.ca.gov/doggr/wellfinder)* – TRG accessed the DOGGR web site to research oil well information at the Property. The map shows no oil wells on or near the Property. The nearest well (API 06500108) is located roughly 3.5 miles south-southeast of the Property and, due to its distance, is not considered an issue to the Property.
- *South Coast Air Quality Management District (SCAQMD)* – TRG accessed the SCAQMD online public records portal at <http://www3.aqmd.gov/webappl/fim/prog/search>. The system does not allow for searching by APNs. A physical address is required. This is considered a “Data Gap” as defined by ASTM E1527-13, however, it is the opinion of TRG that the SCAQMD data gap does not affect the findings of this investigation since no records are anticipated to exist based on other research performed.

8.8 Synopsis of Previous Environmental Investigations

Other than the May 2018 limited Phase II soil vapor survey at the Property summarized below, no known previous environmental investigations have been performed at the Property.

- 2018 Soil Vapor Investigation – On May 3, 2018, TRG collected a total of 12 soil vapor samples (SV-1 through SV-12) to depths between 4 and 5 ft bgs at various locations throughout the Property and the adjoining east parcel, particularly near the adjoining northwest gas station at 31429 Yucaipa Boulevard. As detailed in the *Limited Phase II Soil Vapor Sampling Report*, dated May 15, 2018 (see **Appendix F**), no VOCs were detected in any of the 12 soil vapor samples collected.

9.0 CONCLUSIONS & OPINIONS

In May 2018, a Phase I Environmental Site Assessment (Phase I ESA), consistent with American Society for Testing Materials (ASTM) Standard E1527-13, was performed for the five adjoining parcels located at the southeast corner of Yucaipa Boulevard and Avenue E in Yucaipa, California (APNs: 0300-191-17, -28, -29, -30, and -31).

Based on historical research and the Property reconnaissance the following recognized environmental condition (REC) was identified at the Property:

1. Possible pesticide and/or herbicide impact to shallow soils from approximately 30 years (1938 to 1968) of agricultural use.

It is the opinion of TRG that shallow soil sampling should be performed throughout the Property to mitigate or confirm the pesticide/herbicide REC.

10.0 PROFESSIONAL CREDENTIALS

All work associated with this Environmental Site Assessment was performed by or under the direct supervision of F. Edward Reynolds, Jr. Mr. Reynolds has worked in the environmental industry for more than 25 years and holds several credentials including those of a Registered Environmental Property Assessor (#963067) and California Registered Civil Engineer (No. 38677). Mr. Reynolds meets the certification, licensing, education, and experience required under EPA's 40 CFR Part 312 for "Environmental Professionals". TRG, established in 1989, provides environmental consulting and contracting services.

Rosanne Fischer has worked in the environmental industry for more than 20 years. Ms. Fischer is a Registered Environmental Property Assessor (REPA No. 419564) and performs numerous

Phase I Environmental Site Assessments each year. Ms. Fischer meets the certification, licensing, education, and experience required under EPA's 40 CFR Part 312 for "Environmental Professionals".

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by The Reynolds Group were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

CHEVRON STATION NO 9	31412 YUCAIPA BLVD	W 0 - 1/8 (0.057 mi.)	E24	28

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2018 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SLIC:

Region: STATE
Facility Status: **Open - Assessment & Interim Remedial Action**
Status Date: 02/08/2013
Global Id: SL0607135888
Lead Agency: SANTA ANA RWQCB (REGION 8)
Lead Agency Case Number: Not reported
Latitude: 34.023391
Longitude: -117.105932
Case Type: Cleanup Program Site
Case Worker: AK
Local Agency: Not reported
RB Case Number: 2080038
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)

Site History: The Site is located approximately 0.75 miles north of Interstate 10 and the Live Oak Canyon exit, within the southern portion of San Bernardino County. The Site occupies approximately 10 acres of land within a mixed industrial and residential area. The Site is relatively flat with an average elevation of 2,085 feet above mean sea level. At the Site, first groundwater is generally present within lenses of silty sand that are interbedded in a slightly to moderately plastic clay-rich soil mixture. The general groundwater flow direction at the Site is toward the northeast, with an average groundwater gradient of 0.021 feet per foot. The depth to the groundwater in the existing monitoring wells ranges from 29 to 46 feet at the northern area of the Site. Groundwater was not encountered in the monitoring wells installed to a depth of 100 feet, in the southern area of the Site. There are currently seventeen monitoring wells at on- and off-Site locations: JMW-1 through JMW-4, JMW-6, JMW-8 through JMW-11, and JMW-17 and JMW-18 at on-Site locations. JMW-7 at Dafna Village (private property) JMW-13, JMW-14, and JMW-15(S/D) on public streets in the downgradient area. Previous investigations at the Site included evaluations of soil vapor, soil matrix and groundwater (using Hydropunch technology and installation of groundwater monitoring wells) to define the extent of VOCs in the soil and groundwater. Soil and soil vapor impacts were detected in the southern portion of the Site. Soil vapor impacts were not detected in the northern portion of the Site. During the most recent investigation, tetrachloroethylene (PCE) was detected in soil vapor samples with a concentration range of 0.137 to 381 micrograms per liter (a%g/L). PCE concentrations in soil ranged from 5 to 319 micrograms per kilogram (a%g/kg). The maximum PCE concentration detected in groundwater was 34,200 a%g/L, in a sample from well JMW-9

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 2885

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 125466

Waste code: D008
Waste name: LEAD
Amount (Lbs): 2169

Waste code: D029
Waste name: 1,1-DICHLOROETHYLENE

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 04/06/2018
Number of Days to Update: 14	Next Scheduled EDR Contact: 07/16/2018
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A
Date Made Active in Reports: 01/05/2018	Last EDR Contact: 04/06/2018

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Number of Days to Update: 92	Next Scheduled EDR Contact: 07/16/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Northwest Map:	5630631 REDLANDS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

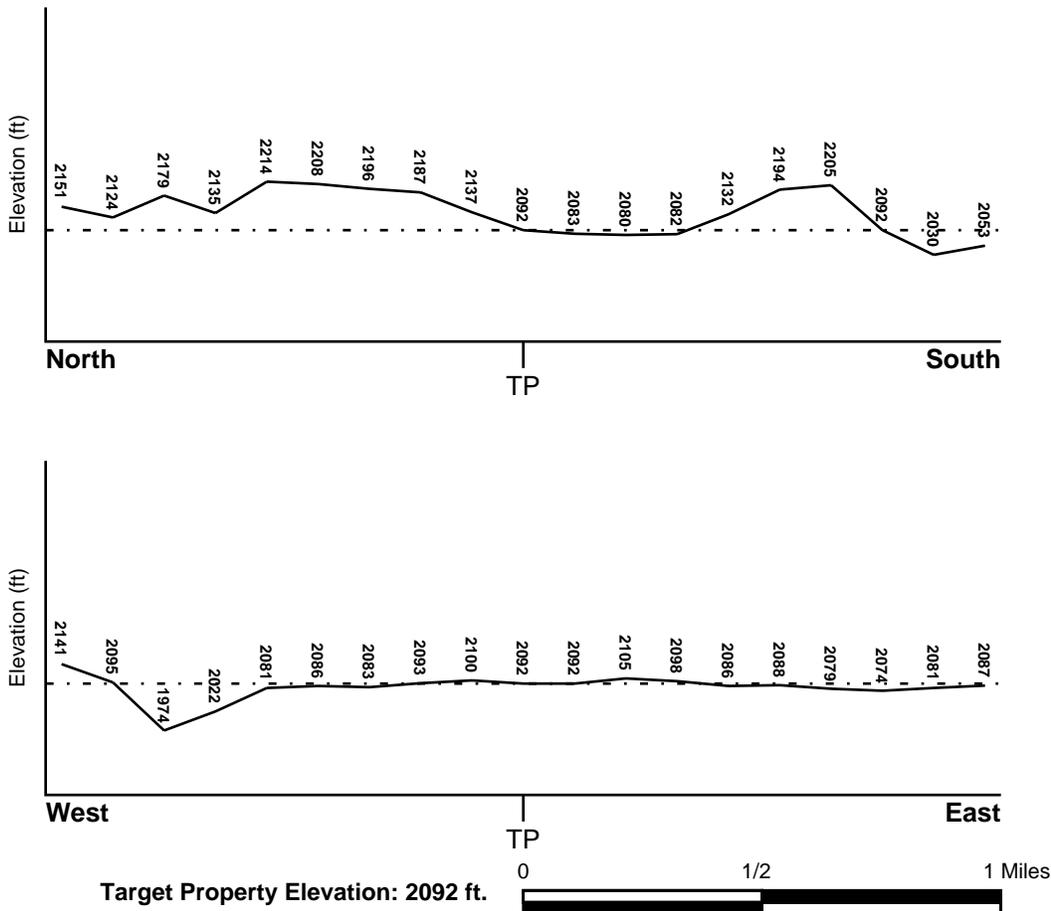

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8740H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C8717H	FEMA FIRM Flood data
06071C8719H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	1/8 - 1/4 Mile West	WSW
1G	1/8 - 1/4 Mile West	WSW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6.3 Min: 5.6
2	22 inches	31 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.8 Min: 6.6
3	31 inches	53 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.8 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
4	53 inches	59 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.6

Soil Map ID: 2

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6.5 Min: 5.6
2	22 inches	31 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 7.8 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
3	31 inches	53 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 4 Min: 1.4	Max: 7.8 Min: 6.6
4	53 inches	59 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.6

Soil Map ID: 3

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
2	11 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by The Reynolds Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 7F3A-4875-AC7C

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Environmental Lien and AUL Search

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Exhibit A
Legal Description

PARCEL NO. 1:

Block 139 of Subdivision No. 3 of a portion of the Dunlap Ranch, in the City of Yucaipa, County of San Bernardino, State of California, as per map recorded in Book 20 of Maps, Page 71, in the office of the County Recorder of said County.

Except therefrom that portion as conveyed to the County of San Bernardino, a body corporate and politic, recorded July 31, 1952 in Book 2992, Page 551 of Official Records, described as follows:

Commencing at the Northeast corner of said Lot 139; thence South $72^{\circ} 45'$ West 345.6 feet along the centerline of Yucaipa Boulevard to the Northwest corner of said Lot 139; thence South 36.65 feet along the West line of said Lot 139; thence North $72^{\circ} 45'$ East 345.6 feet to a point on the East line of said Lot 139; thence North 36.65 feet along the said East line to the point of beginning and containing 0.0397 acres, more or less, exclusive of the present highway.

PARCEL NO. 2:

Block 6 of Subdivision No. 5 of a part of the Dunlap Ranch, in the City of Yucaipa, County of San Bernardino, State of California, as per map recorded in Book 23 of Maps, Pages 57 and 58, in the office of the County Recorder of said County.

Except therefrom the West 248.00 feet.

Also except therefrom the South 439.5 feet, measured from the center line of 60 foot wide Avenue "E".

Also except therefrom that portion conveyed to the County of San Bernardino for road purposes by deed recorded August 8, 1952 in Book 3000, Page 262 of Official Records.

Areas and distances of the above described property are computed to the center of all adjoining streets and roads, as shown on said map.

of the State of California
MAR 22 1983
MARCH FONG ELL, Secretary of State
By Bill Hoan
Deputy

83-067976

PETROLANE PROPERTIES, INC., a California corporation, hereinafter sometimes called "PPI", and STATER BROS. MARKETS, a California corporation, hereinafter sometimes called "SBM", agree as follows:

ARTICLE 1. RECITALS OF CONSTITUENT CORPORATIONS

Section 1.01. PPI is a corporation duly organized, validly existing, and in good standing under the laws of the State of California. PPI is authorized to issue 200,000 shares of common stock, with par value of One Dollar (\$1.00) per share, 50,000 of which are outstanding on the date hereof.

Section 1.02. SBM is a corporation duly organized, validly existing, and in good standing under the laws of the State of California. SBM is authorized to issue 25,000 shares of common stock without par value, 1,000 of which are issued and outstanding on the date hereof. SBM is authorized to issue 250,000 shares of \$11.00 Cumulative Preferred Stock without par value, none of which are outstanding on the date hereof.

Section 1.03. SBM is to be the surviving corporation, as that term is defined in the General Corporation Law of California, to the merger described in this agreement.

ARTICLE 2. MERGER

Section 2.01. PPI shall be merged into SBM under the laws of the State of California.

Section 2.02. The name of the surviving corporation shall be STATER BROS. MARKETS.

ARTICLE 3. TERMS AND CONDITIONS

Section 3.01. Between the date of this agreement and the date on which the merger shall become effective, either constituent corporation shall not:

Except in the normal course of business and for adequate value, dispose of any of its assets.

Section 3.02. If at any time the surviving corporation shall consider or be advised that any further assignments or assurances in law are necessary to vest or to perfect or to confirm of record in the surviving corporation the title to any ~~property or rights of PPI, or otherwise carry out the provisions~~ hereof, the proper officers and directors of PPI, as of the effective date of the merger, shall execute and deliver all proper deeds, assignments, confirmations, and assurances in law, and do all acts proper to vest, perfect, and confirm title to such property or rights in the surviving corporation, and otherwise carry out the provisions hereof.

83-067975

ARTICLE 4. BASIS OF CONVERTING SHARES

Section 4.01.

(a) At the effective date of the merger, each share of the common stock of the disappearing corporation with a par value of One Dollar (\$1.00) (other than shares held by disappearing corporation as treasury shares) shall be converted into two-hundredths (.02) of a share of common stock without par value of the surviving corporation.

(b) No fractional shares of the common stock of the surviving corporation will be issued to the holders of the common stock of the disappearing corporation, but holders who would otherwise be entitled to receive a fraction of a share of the common stock of the surviving corporation on the basis of the conversion provided for herein shall in lieu thereof receive a cash payment equal to the value of such fraction, based on the market value of the common stock of the disappearing corporation as of the effective date of the merger.

(c) Any shares of the disappearing corporation, common or preferred, held by the disappearing corporation in its treasury on the effective date of the merger shall be surrendered to the surviving corporation for cancellation.

Section 4.02. Each holder of the shares of the disappearing corporation shall surrender his shares, properly endorsed, to the surviving corporation or its agent, and shall thereupon receive in exchange therefor a certificate or certificates representing the number of shares of the surviving corporation into which the shares of the disappearing corporation have been converted.

83-067975

Section 4.03. The presently outstanding 1,000 shares of common stock of SBM shall be cancelled and no shares of surviving corporation shall be issued in exchange therefor.

ARTICLE 5. DIRECTORS

Section 5.01. The following named persons shall serve as the Board of Directors of the surviving corporation until the next annual meeting or until such time as their successors have been elected and have qualified:

- JACK H. BROWN
- JOESEPH E. DAVIS
- BERNARD R. GARRETT
- MARK A. RESNIK
- L. DOUGLAS MCKENZIE

ARTICLE 6. ARTICLES OF INCORPORATION

Section 6.01. The articles of SBM, as existing on the effective date of the merger, shall continue in full force as the articles of the surviving corporation until altered, amended as provided therein, or as provided by law.

ARTICLE 7. BY-LAWS

Section 7.01. The by-laws of SBM, as existing on the effective date of the merger, shall continue in full force as the bylaws of the surviving corporation until altered, amended, or repealed as provided therein or as provided by law.

83-067975

ARTICLE 8. TERMINATION

Section 8.01. This agreement may be terminated and the merger herein provided for may be abandoned at any time prior to the effective date of the merger, whether before or after shareholder approval, at the election of the Board of Directors of SBM or PPI if the Closing under that certain AGREEMENT FOR THE PURCHASE AND SALE OF STOCK OF STATER BROS. MARKETS AND PETROLANE PROPERTIES, INC., dated the 4th day of March 1983 by and among PETROLANE INCORPORATED, HAMPSHIRE INVESTMENTS, INC., SBM, and PPI, as the term Closing is defined therein, does not occur within two (2) days of the date hereof.

Section 8.02. In the event an election is made to terminate this agreement and abandon the merger provided for herein:

(a) The President or any Vice President of the constituent corporation whose Board of Directors has made such election shall give written notice thereof to the other constituent corporation.

(b) Upon the giving of such notice as provided in subsection (a), this agreement shall terminate and the proposed merger be abandoned and, except for payment of its own costs and expenses incident to this agreement, there shall be no liability on the part of either constituent corporation as a result of such termination and abandonment.

ARTICLE 9. INTERPRETATION AND ENFORCEMENT

Section 9.01. Any notice, request, demand, or other communication required or permitted hereunder shall be deemed to be properly given when deposited in the United States mail,

postage prepaid, certified, return receipt requested, or when deposited with a public telegraph company for transmittal, charges prepaid, addressed:

If to PPI: PETROLANE PROPERTIES, INC.
8575 Higuera Street
Culver City, CA 90230

ATTN: Mark A. Resnik

With a copy to: Grossman, Barr & Grant

21700 Barton Road
Colton, CA 92324

ATTN: President

With a copy to: MARK A. RESNIK
8575 Higuera Street
Culver City, CA 90230

Section 9.02. This agreement may be executed in any number of counterparts, each of which shall be deemed an original.

Section 9.03. The validity, interpretation, and performance of this agreement shall be controlled by and construed under the laws of the State of California, the state in which this agreement is being executed.

Executed on March 22, 1983, at Los Angeles, California.

**REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS
 RECORDS SEARCH FINDING REPORT**

The main focus of a REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT is to determine whether there exists in San Bernardino County Fire Department (County Fire) files any record relating to contamination or reports of spills at a particular site. A Certified Hazardous Materials Records Search Finding Report should reveal whether there are any facilities at the site that are subject to current or past regulatory activity by County Fire, such as underground storage tanks, hazardous material handlers, hazardous waste generators, and EPCRA or CalARP facilities, as well as any reports of spills, incidents, complaints, or cleanup activity, that can be a useful tool in providing a history of compliance or non-compliance.

Once County Fire has completed its records search, a Certified Hazardous Materials Records Search Finding Report will be prepared and issued, which will detail all County Fire records associated with a particular site by type, date, location, and status where applicable. (Any files identified in a Certified Hazardous Materials Records Search Finding Report can be made available for copies and/or review upon request.)

If the completed records search reveals no County Fire record of hazardous material activity at the site, a Certified Hazardous Materials Records Search Finding Report will be issued, noting that "no records" were identified.

Please provide a specific site address or location description. If a situs address does not exist or cannot be found, list another type of location identifier such as Assessor Parcel Number (preferable), cross streets or intersections (e.g., NWC 5th Ave. & Main St.), and/or legal description, and if possible attach a map to this request form.

DISCLAIMER: While all attempts are made to provide accurate, current, and reliable information, County Fire recognizes the possibility of human error. Therefore, County Fire, its officers, employees, agents and volunteers, make no representations as to the accuracy, completeness or suitability of a Certified Hazardous Materials Records Search Finding Report and provides a Certified Hazardous Materials Records Search Finding Report "as is", with no warranties, express or implied, including the implied warranty of fitness for a particular purpose. In no event shall County Fire be liable for any damages of any nature whatsoever, arising out of the issuance of a Certified Hazardous Materials Records Search Finding Report. County Fire therefore assumes no liability for damages incurred directly or indirectly as a result of any errors, omissions or discrepancies in a Certified Hazardous Materials Records Search Finding Report.

RELEASE AND INDEMNIFICATION: In consideration for the issuance of a Certified Hazardous Materials Records Search Finding Report, I hereby release and forever discharge County Fire, its officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability in connection with County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report, including, but not limited to, claims that may arise due to the active or passive negligence of County Fire, its officers, employees, agents and volunteers.

I am familiar with the provisions of California Civil Code Section 1542, which provides as follows:

"A general release does not extend to claims which the creditor does not know or suspect to exist in his or her favor at the time of executing the release, which if known by him or her must have materially affected his or her settlement with the debtor."

I hereby expressly waive any and all rights that I may have there under. I understand and acknowledge the significance and consequence of this specific waiver of California Civil Code Section 1542 and assume full responsibility for any injuries, damages, losses or liabilities that I may hereafter discover as possibly resulting from County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report.

In further consideration for County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report, I hereby agree, for myself, my heirs, administrators, executors and assigns, that I shall indemnify, defend (with counsel approved by County) and hold harmless County Fire, its officers, employees, agents and volunteers from any and all claims, demands, actions or suits arising out of or in connection with County Fire's issuance of a Certified Hazardous Materials Records Search Finding Report brought by any third party.

* * *

I have read the above terms and conditions, including the paragraphs entitled "DISCLAIMER" and "RELEASE AND INDEMNIFICATION", and by my signature below, I affirm that I understand these terms and conditions and accept them as part of my REQUEST FOR A CERTIFIED HAZARDOUS MATERIALS RECORDS SEARCH FINDING REPORT.

I hereby request a Certified Hazardous Materials Records Search Finding Report for the location described on Page 1 of this application.

- I am including payment of the initial fee of \$130.00, for the first hour of research, by check or money order, payable to San Bernardino County Fire Dept. I understand that research exceeding one hour will be billed at the rate of \$130.00 for each additional hour spent by County Fire in completing this request.

- I have faxed or emailed this request and will forward payment along with the original request form within 48 hours.

APPENDIX F

**PHASE II SOIL VAPOR SAMPLING REPORT
DATED MAY 15, 2018**

May 15, 2018
(TRG 8460)

Mr. Leonard Fifer
FORCE ENVIRONMENTAL
41870 Kalmia Street, Suite 115
Murrieta, CA 92562

**SITE: 23.84 UNDEVELOPED ACRES
SOUTHEAST CORNER OF YUCAIPA & AVENUE E
YUCAIPA, CALIFORNIA**

SUBJECT: LIMITED PHASE II SOIL VAPOR SAMPLING REPORT

Dear Mr. Fifer,

This report summarizes soil vapor sampling performed in May 2018 at the 23.84 undeveloped acres adjoining south of Yucaipa Boulevard, between Avenue E to the West and 18th Street to the east in Yucaipa, California (the Site, see **Figure 1** – Site Location Map). The purpose of the work was to confirm that nearby gasoline service stations and auto repair facilities have not impacted shallow soils beneath the subject Site.

1.0 EXECUTIVE SUMMARY

On May 3, 2018, TRG collected 12 soil vapor samples (SV-1 through SV-12) from depths between 4 and 5 feet below ground surface (ft bgs) at various locations throughout the Site, particularly near the adjoining northwest gas station at 31429 Yucaipa Boulevard (see **Figure 2** – Site Plan with Soil Vapor and Soil Boring Locations).

No volatile organic compounds (VOCs) were detected in any of the 12 soil vapor samples collected. As such, it appears no vapor intrusion health risk exists at the Site.

2.0 FIELDWORK

Prior to beginning the fieldwork, Dig-Alert was contacted for underground utility clearance and all interested parties were notified in advance of the project schedule.

2.1 Soil Vapor Sampling

On March 3, 2018, TRG in conjunction with Optimal Technology of Thousand Oaks, California, collected 12 soil vapor samples (SV-1 through SV-12) and one duplicate sample (SV-12-DUP) from depths of 4 or 5 ft bgs at locations shown on **Figure 2**. The soil vapor sampling followed the July 2015 DTSC/LARWQCB *Advisory - Active Soil Gas Investigations (the Advisory)*.

Soil Vapor Probe Installation

The placement of the temporary soil vapor probes was performed by hydraulically pushing one-inch diameter stainless steel soil vapor probes to the desired depth. Once the probes were installed, hydrated bentonite chips were placed around the probes at the ground surface to ensure proper seal of the probes, and soil vapor samples were directly sampled through the probes. Soil vapor was first purged and then collected. Clean gas probes were used for each sampling location.

Soil Vapor Sampling

Soil vapor samples were collected from the termination of each probe at a constant low flow rate measuring 200 milliliters per minute (ml/min) as shown by an in-line vacuum gauge to limit stripping (ie. enhanced compound partitioning from impacted soil or groundwater), to prevent ambient air intrusion and increase the likelihood of representative samples. The default three

volume purge was used for the soil vapor sampling. One purge volume is defined as the total volume of air space which is the summation of the sample volume, internal sampling equipment volume and annular space around the probe tip. New tubing was used at each sampling point to prevent cross contamination.

Leak testing was conducted at every soil vapor probe location. Isobutane, found in common shaving cream, was used as the tracer gas. The tracer gas compound was applied to the soil vapor probes at each point of connection in which ambient air could enter the sampling system, including the top of the sampling probe where the tubing meets the probe connection and the surface bentonite seals. A detection of the tracer compound in the subsurface soil vapor sample indicates that ambient air intrusion occurred. No leaks were determined to have occurred during the sampling activities.

Vapor samples were obtained in SGE gas-tight syringes by drawing the sample through a luer-lock connection which connects the sampling probe and vacuum pump. Samples were immediately injected into the gas chromatograph/purge and trap after collection.

After sampling, the soil probe locations were backfilled with hydrated bentonite chips and the surfaces repaired with quick setting concrete. No field wastes were generated during the soil vapor work.

3.0 LABORATORY ANALYSES AND RESULTS

All soil vapor samples (SV-1 through SV-26) were immediately analyzed on-Site by Optimal Technology for VOCs using EPA Method 8260B. A copy of Optimal Technology's report is included as **Attachment A**.

Soil vapor samples collected in all 12 locations (SV-1 through SV-12) were non-detect for VOCs.

4.0 CONCLUSIONS

Based on the limited soil vapor sampling performed at the Site, vapor intrusion health risk to occupants of the Site from nearby gas stations and auto repair facilities does not appear to be an issue of concern at the Site.

5.0 REGISTERED PROFESSIONAL STATEMENT

All work on this project was performed under the responsible charge of a California Registered Civil Engineer. The licensed professional whose signature and seal appears at the end of this report supervised and/or conducted all work associated with the project.

Please contact Rosanne Fischer, our Project Manager for this case with any questions. She can be reached directly at 714-730-5397 Ext. 123 or by email to fischer@reynolds-group.com.

Sincerely,

THE REYNOLDS GROUP
California corporation by:

F. Edward Reynolds, Jr.
California Registered Civil Engineer #38677

ATTACHMENT A
OPTIMAL ANALYTICAL REPORT

May 3, 2018

Mr. Joshua Hudekoff
The Reynolds Group
520 W. 1st St.
Tustin, CA 92780

Dear Mr. Hudekoff:

This letter presents the results of the soil vapor investigation conducted by Optimal Technology (Optimal), for The Reynolds Group on May 3, 2018. The study was performed at 31429 Yucaipa Blvd., Yucaipa, California.

Optimal was contracted to perform a soil vapor survey at this site to screen for possible chlorinated solvents and aromatic hydrocarbons. The primary objective of this soil vapor investigation was to determine if soil vapor contamination is present in the subsurface soil.

Gas Sampling Method

Gas sampling was performed by hydraulically pushing soil gas probes to a depth of 4.0-5.0 feet below ground surface (bgs). An electric rotary hammer drill was used to drill a 1.0-inch diameter hole through the overlying surface to allow probe placement when required. The same electric hammer drill was used to push probes in areas of resistance during placement.

At each sampling location, an electric vacuum pump set to draw 0.2 liters per minute (L/min) of soil vapor was attached to the probe and purged prior to sample collection. Vapor samples were obtained in SGE gas-tight syringes by drawing the sample through a luer-lock connection which connects the sampling probe and the vacuum pump. Samples were immediately injected into the gas chromatograph/purge and trap after collection. New tubing was used at each sampling point to prevent cross contamination.

All analyses were performed on a laboratory grade Agilent model 6890N gas chromatograph equipped with an Agilent model 5973N Mass Spectra Detector and Tekmar LSC 3100 Purge and Trap. A Restek column using helium as the carrier gas was used to perform all analysis. All results were collected on a personal computer utilizing Agilent's MS and chromatographic data collection and handling system.

Quality Assurance

5-Point Calibration

The initial five-point calibration consisted of 20, 50, 100, 200 and 500 ul injections of the calibration standard. A calibration factor on each analyte was generated using a best fit line method using the Agilent data system. If the r^2 factor generated from this line was not greater than 0.990, an additional five-point calibration would have been performed. Method reporting limits were calculated to be 0.004-1.0 micrograms per Liter (ug/L) for the individual compounds.

A daily calibration check was performed using a pre-mixed standard supplied by Scotty Analyzed Gases. The standard contained common halogenated solvents and aromatic hydrocarbons (see Table 1). The individual compound concentrations in the standards ranged between 0.025 nanograms per microliter (ng/ul) and 0.25 ng/ul.

TABLE 1

Dichlorodifluoromethane	Carbon Tetrachloride	Chloroethane
Trichlorofluoromethane	1,2-Dichloroethane	Benzene
1,1-Dichloroethene	Trichloroethene	Toluene
Methylene Chloride	1,1,2-Trichloroethane	Ethylbenzene
trans-1,2-Dichloroethene	Tetrachloroethene	m-/p-Xylene
1,1-Dichloroethane	Chloroform	o-Xylene
cis-1,2-Dichloroethene	1,1,1,2-Tetrachloroethane	Vinyl Chloride
1,1,1-Trichloroethane	1,1,2,2-Tetrachloroethane	Freon 113
4-Methyl-2-Pentanone	Cyclohexane	Acetone
Chlorobenzene	2-Butanone	Isobutane

Sample Replicates

A replicate analysis (duplicate) was run to evaluate the reproducibility of the sampling system and instrument. The difference between samples did not vary more than 20%.

Equipment Blanks

Blanks were run at the beginning of each workday and after calibrations. The blanks were collected using an ambient air sample. These blanks checked the septum, syringe, GC column, GC detector and the ambient air. Contamination was not found in any of the blanks analyzed during this investigation. Blank results are given along with the sample results.

Tracer Gas Leak Test

A tracer gas was applied to the soil gas probes at each point of connection in which ambient air could enter the sampling system. These points include the top of the sampling probe where the tubing meets the probe connection and the surface bentonite seals. Isobutane was used as the tracer gas. No Isobutane was found in any of the samples collected.

Purge Volume

The standard purge volume of three volumes was purged in accordance with the July 2015 DTSC/RWQCB Advisory for Active Soil Gas Investigations.

Shut-in Test

A shut-in test was conducted prior to purging or sampling each location to check for leaks in the above-ground sampling system. The system was evaluated to a minimum measured vacuum of 100 inches of water. The vacuum gauge was calibrated and sensitive enough to indicate a water pressure change of at least 0.5 inches.

Scope of Work

To achieve the objective of this investigation a total of 13 vapor samples were collected from 12 locations at the site. Sampling depths, vacuum readings, purge volume and sampling volumes are given on the analytical results page. All the collected vapor samples were analyzed on-site using Optimal's mobile laboratory.

Subsurface Conditions

Subsurface soil conditions at this site offered sampling flows at 0" water vacuum. Depth to groundwater was unknown at the time of the investigation.

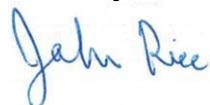

Results

During this vapor investigation, none of the compounds listed in Table 1 above were detected above the listed reporting limits. A complete table of analytical results is included with this report.

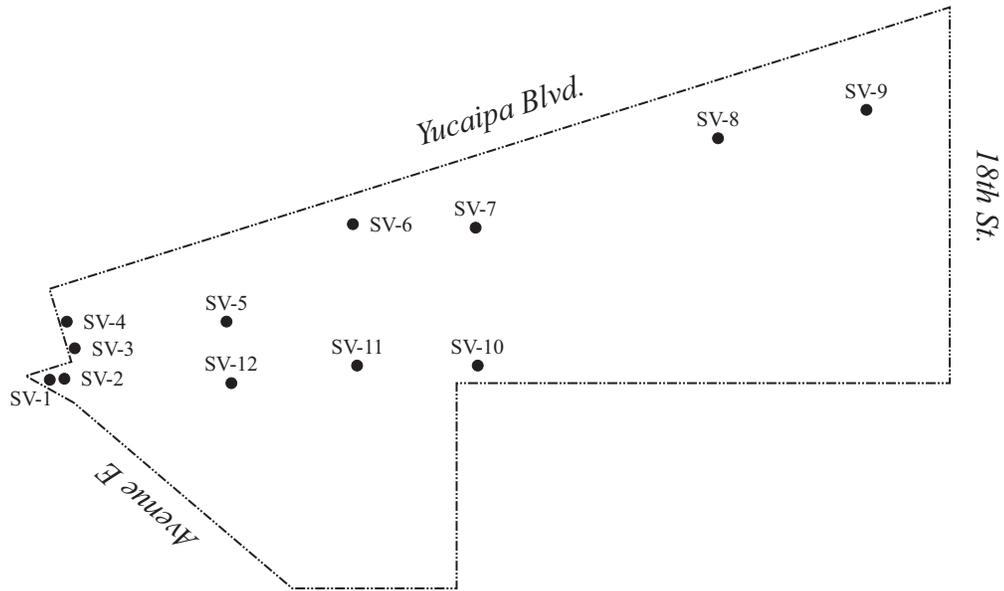

Disclaimer

All conclusions presented in this letter are based solely on the information collected by the soil vapor survey conducted by Optimal Technology. Soil vapor testing is only a subsurface screening tool and does not represent actual contaminant concentrations in either the soil and/or groundwater. We enjoyed working with you on this project and look forward to future projects. If you have any questions, please contact me at (877) 764-5427.

Sincerely,

John Rice
Project Manager
