In the spirit of democracy and transparency, the citizens of Yucaipa are entitled to have some questions answered about the recent abrupt change in City management. What changed between January and the previous October, when the City Manager and Attorney were offered and given two more years in their positions? Apparently, they were given positive evaluations when these contracts were offered. Did some egregious acts occur in the ensuing weeks when it was determined they needed to be quickly replaced?

The only thing that changed to the voters' knowledge was the people sitting at the table when the decision was made. One of the council members who voted for this action did so at his second meeting. How informed could he be on the issues? The voters deserve and demand to know what prompted the "need" for such a sudden and hasty change of mind and direction.

How was a search conducted for a new city manager? It appears there was no search, since the replacements were waiting in the parking lot for the dismissal of the longtime City Manager and the city attorney. What was the reason for such haste, and how was that selection made if not in violation of the Brown Act?

As a 44-year resident of Yucaipa and an engaged citizen, I am entitled to have answers to these questions.
